

Neighbors of Richmond Avenue:

The Richmond Block Club Association has been very busy and working hard this year to make Richmond Avenue a much safer and more beautiful street for our families to live on. Throughout the year, many residents have gotten together to share ideas and express concerns that would better our neighborhood. One idea that is being considered and explored, is the changing of our current cobra-like street lighting to that of the lantern-like Olmstead lighting found in our traffic circles. This lighting would provide much better illumination to our streets and sidewalks and give Richmond Avenue a more parkway-like feel. Richmond Avenue is a fantastic and wonderful place to live. Our street is filled with grand and historical homes, beautiful gardens and great people.

By working together, we can help create a safe and peaceful place to live. Please consider getting involved in our association. Support our street community by attending block club meetings and share with us your

thoughts and ideas to better our neighborhood.
Together, we can make a difference. Let's make
Richmond Avenue the best street to live on in the city!
